Livingston Robotics Club **SENIORS SOLUTIONS FLL GAME FIELD DEMO**

The 2012 FLL theme is Senior Solutions. Can FLL teams improve the quality of life for seniors by helping them continue to be independent, engaged, and connected in their communities?

Over 200,000 children ages 9 to 16 from more than 60 countries will explore the topic of aging and how it may affect a person's ability to maintain his or her lifestyle – solving issues like getting around, keeping in touch, or staying fit.

Teams will research obstacles and then suggest ways to improve the quality of life for the seniors affected. Teams will also build, test, and program an autonomous robot using LEGO MINDSTORMS® robot to solve a set of missions on an obstacle course.

Exit 5 Robotics, a third year team of eight girls from Livingston (although only seem to fit 6 in a picture at any given time), will be partnering with other local FLL teams to demo the FLL robot game field for the 2012 Senior Solutions. A robot or two will be running a mission or two to demonstrate the robotics game challenge.

So bring your questions and share your robotics enthusiasm with the team. They will happily share their experiences from the previous seasons and are open to any great ideas to help the team out.
