Livingston Robotics Club **RC CAR versus ROBOT – RACE CHALLENGE**

On Sunday, Exit 5 Robotics, a third year FLL team of eight girls from Livingston will host this special activity booth.

This demo is named “Danica 2” in honor of IBM’s Watson from Jeopardy and Stanford’s Stanley autonomous car.

“Danica 1” was an earlier summer project using slot cars.

“Danica 2” will be an attempt to have an autonomous robot race an RC car piloted by young humans (that’s YOU!) or young-at-heart humans (that’s your grandparents or parents) around a track.
